

Record Patient Consent

1. Access patient consents to quickly review or manage permission forms.

2. Select 'Universal Consent' to update or review consent status needed for care.

3. Click 'Continue' to move forward with the consent process.

The screenshot shows the Canvas EHR interface for patient Bradley Sikes. A 'Universal Consent' dialog box is open, displaying the 'Review' step. The dialog contains the following text:

Universal Consent

1 Review 2 Finalize

Today, we'll review your health history, talk through any concerns, and support your ongoing care.

Before we begin, I want to review the key points of your registration and consent. The full consent is available to you by link, email, text, or paper copy, and you can ask questions before agreeing.

By consenting today, you allow our care team to evaluate and treat you, provide ongoing care management and care coordination support, communicate with you or your authorized representative, coordinate with other providers or individuals involved in your care as permitted, document your care in your medical record, and use electronic tools, including scribing or dictation support, when appropriate to help document your visit.

You also allow us to use your health information for treatment, payment, and healthcare operations, bill your insurance, and assign benefits for payment. You acknowledge that you received or were offered access to our Notice of Privacy Practices and other patient disclosures. Services may be billed to your insurance, and any patient responsibility would depend on your individual coverage.

Buttons: Cancel, Continue (circled in blue)

4. Confirm the patient has no further questions before recording consent.

The screenshot shows the Canvas EHR interface for patient Bradley Sikes. The 'Universal Consent' dialog box is open, displaying the 'Review' step. The dialog contains the following text:

Universal Consent

1 Review 2 Finalize

How is the consent being obtained?

☒ Verbal ☐ Written

Who is giving consent?

☒ Patient ☐ Representative

Effective date

07/16/2026

Obtained by Canvas Support

Do you have any questions?

Yes No (circled in blue)

Is it okay for us to document your consent today?

Yes No

Buttons: Back, Record Consent

5. Authorize documentation by selecting 'Yes' to record consent today.

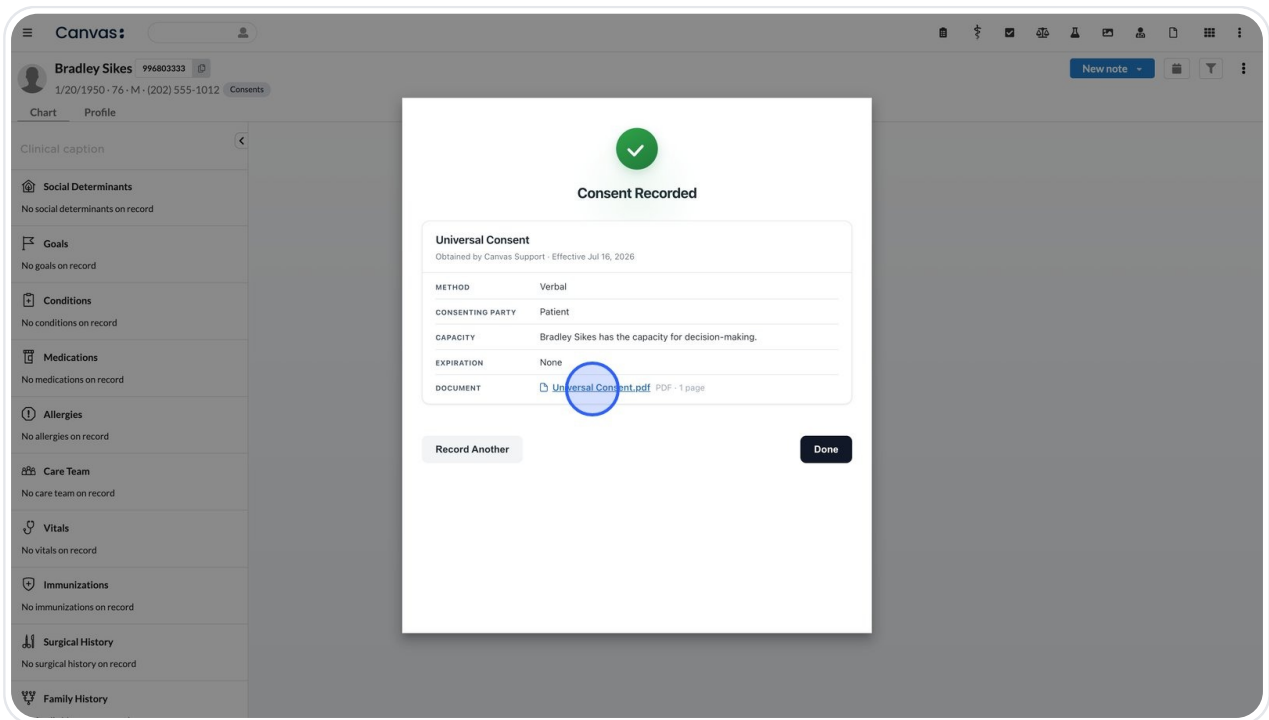

The screenshot shows the Canvas EHR interface for patient Bradley Sikes. A 'Universal Consent' dialog box is open, displaying the 'Review' step. The dialog includes the following information:

- How is the consent being obtained?** Verbal (selected), Written
- Who is giving consent?** Patient (selected), Representative
- Effective date:** 07/16/2026
- Obtained by:** Canvas Support
- Do you have any questions?** Yes, No
- Is it okay for us to document your consent today?** Yes (circled in blue), No
- Buttons:** Back, Record Consent

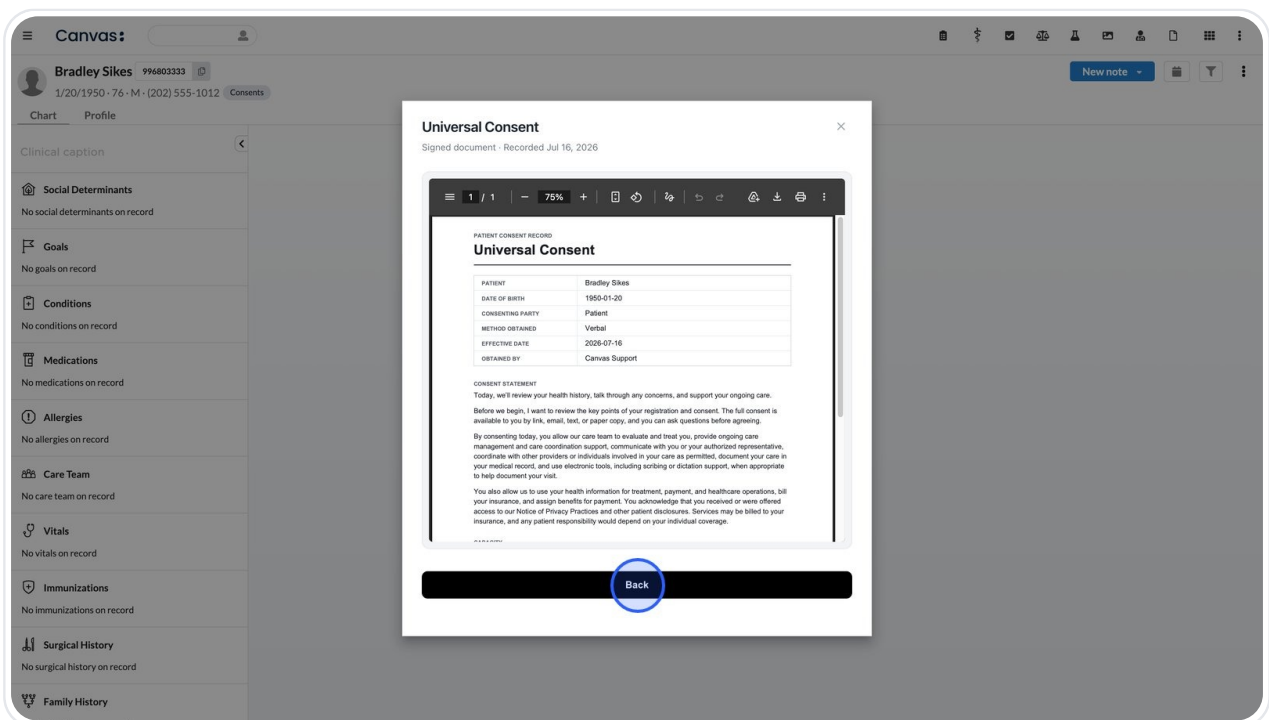

6. Record consent details for a clear and compliant patient history.

This screenshot is identical to the one above, showing the 'Universal Consent' dialog box in the 'Review' step. In this view, the 'Record Consent' button at the bottom right is circled in blue, indicating the next action to be taken.

7. View or download the signed consent document for secure record-keeping.

8. Click 'Back' to return from the consent document preview to patient records.

9. Complete the consent workflow and confirm the update in the patient's record.

The screenshot shows the Canvas EHR interface for patient Bradley Sikes. A modal dialog titled "Consent Recorded" is displayed in the center. At the top of the dialog is a green checkmark icon. Below the title, a box labeled "Universal Consent" contains the following details: "Obtained by Canvas Support - Effective Jul 16, 2026", "METHOD: Verbal", "CONSENTING PARTY: Patient", "CAPACITY: Bradley Sikes has the capacity for decision-making.", "EXPIRATION: None", and "DOCUMENT: Universal Consent.pdf PDF - 1 page". At the bottom of the dialog are two buttons: "Record Another" and "Done". The background shows the patient's profile with various clinical sections like Social Determinants, Goals, Conditions, Medications, Allergies, Care Team, Vitals, Immunizations, Surgical History, and Family History, all indicating "No [category] on record".

Consent Recorded

Universal Consent
Obtained by Canvas Support - Effective Jul 16, 2026

METHOD	Verbal
CONSENTING PARTY	Patient
CAPACITY	Bradley Sikes has the capacity for decision-making.
EXPIRATION	None

[Record Another](#) [Done](#)

10.

This screenshot shows the same Canvas EHR interface for Bradley Sikes, but with the "Consent Recorded" dialog removed. The patient's profile is visible, showing the same list of clinical sections as in the previous image: Social Determinants, Goals, Conditions, Medications, Allergies, Care Team, Vitals, Immunizations, Surgical History, and Family History. Each section currently displays "No [category] on record". The interface includes a top navigation bar with the Canvas logo and a right-hand toolbar with icons for various functions.
