

Capture

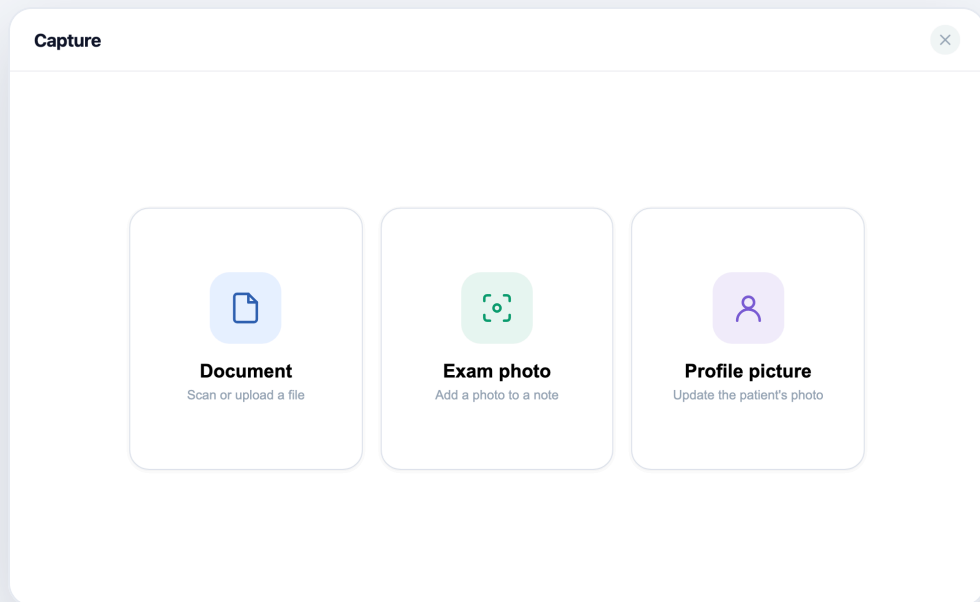

User Guide

Add documents, exam photos, and profile pictures to a patient's chart — right from the chart or the Provider Companion.

Choose what to add

Open Capture from the patient chart's app drawer, or the Capture tab in the Provider Companion. Then pick one of three options:

Document

Scan or upload a file — saved under Documents.

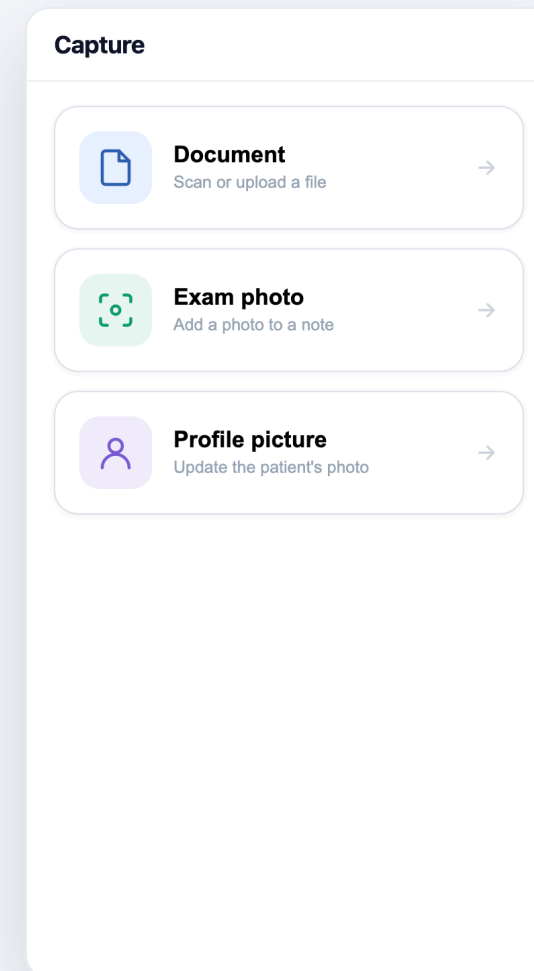

Exam photo

Add a photo to one of your open notes.

Profile picture

Update the patient's photo.

PROVIDER COMPANION

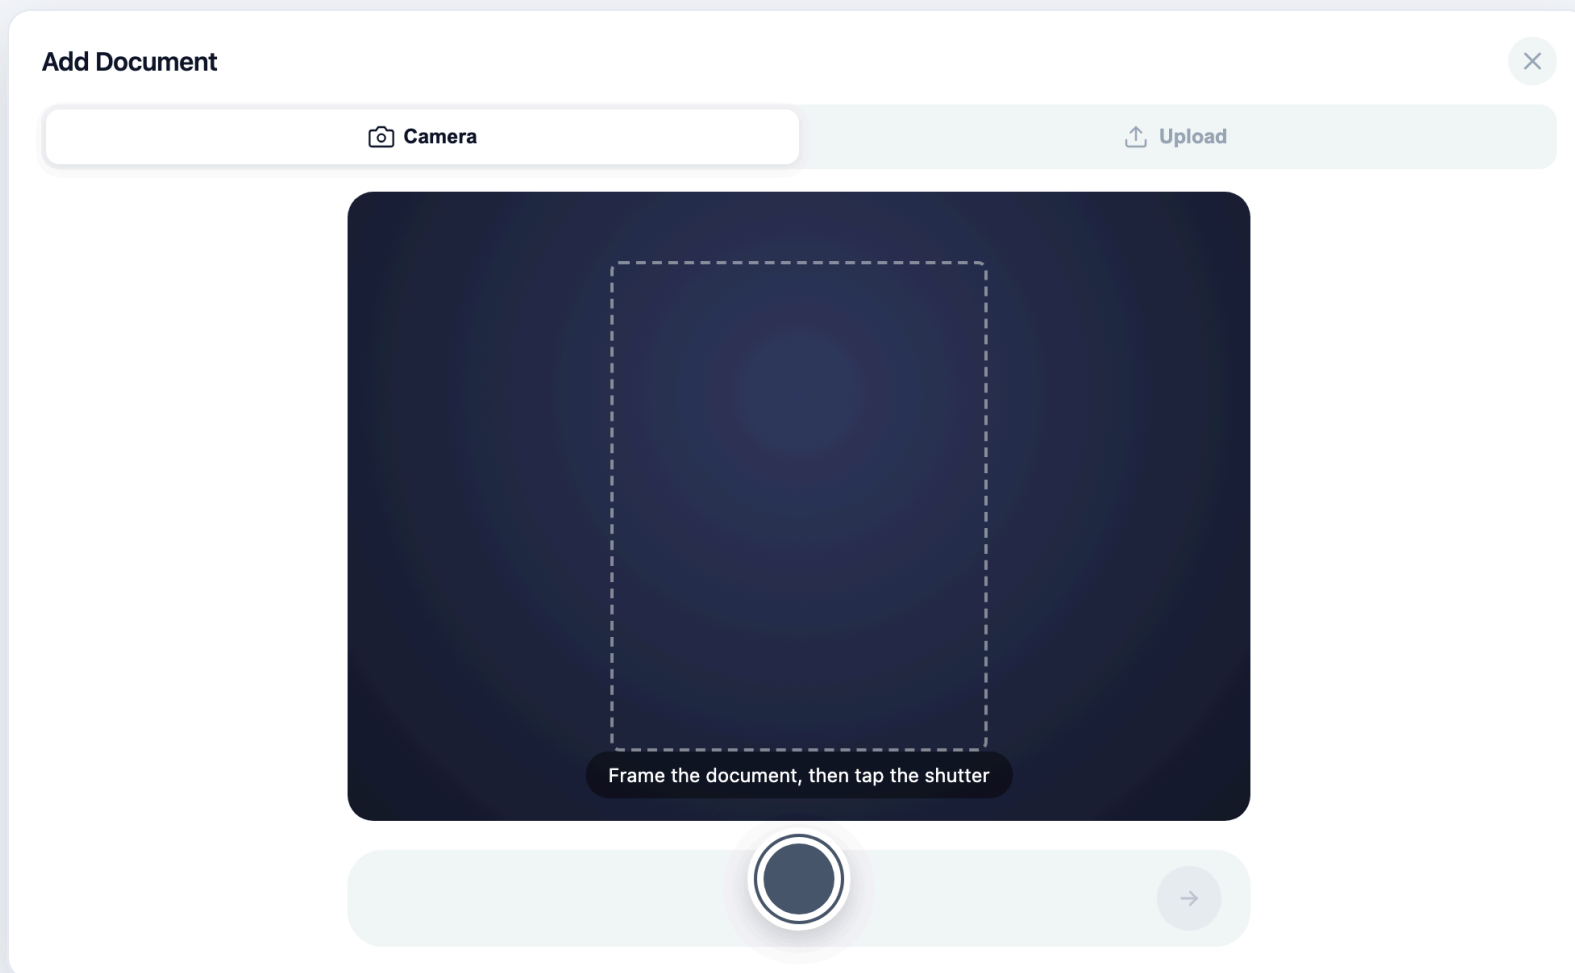

FLOW 1

Add a Document

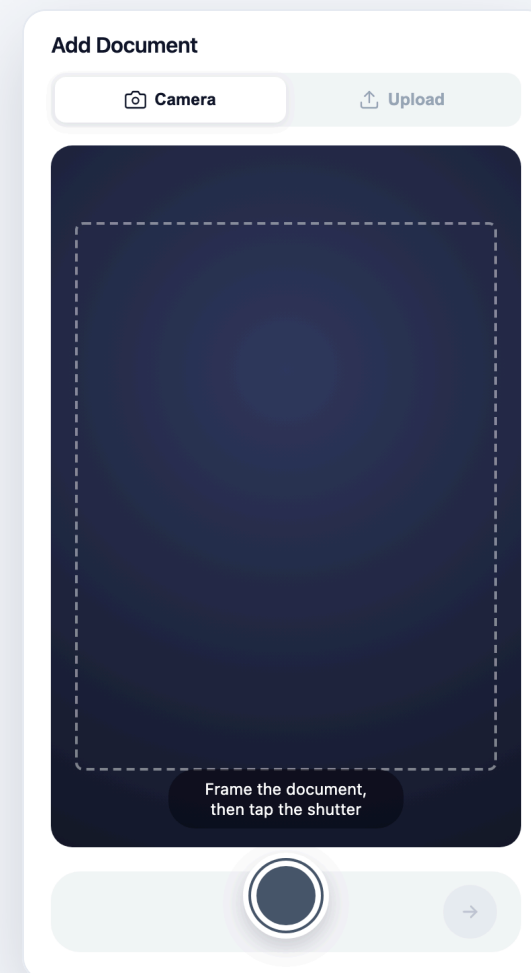

1 • Capture or upload

Photograph each page with the camera, or switch to Upload for a PDF, JPG, PNG, or HEIC.

IN THE PATIENT CHART

PROVIDER COMPANION

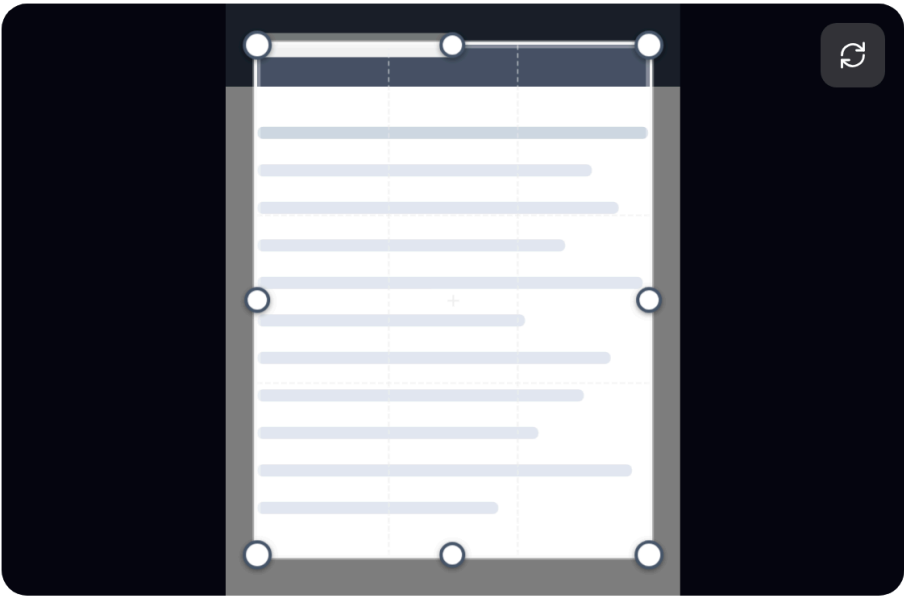

2 • Review & crop

Straighten, rotate, and crop each page. Add more pages whenever you need to.

IN THE PATIENT CHART

Review & Crop

The interface shows a document with horizontal lines representing text. A dark grey crop box is overlaid on the document, with white circular handles at the corners and midpoints of the sides for adjustment. A small square button with a circular arrow icon is located in the top right corner of the crop box. The entire interface is set against a dark background.

Retake

PROVIDER COMPANION

Review & Crop

The interface is similar to the Patient Chart version but is scaled for a smaller screen. It features a document with horizontal lines, a dark grey crop box with white adjustment handles, and a circular arrow icon in the top right corner of the crop box. The background is dark.

Good to know

- Documents can be up to 20 pages and 10 MB. Supported files: PDF, JPG, PNG, HEIC.
- Exam photos attach only to your own open (unsigned) notes.
- Saving is retry-safe — retrying after an error never creates duplicates.
- Everything works the same in the patient chart and the Provider Companion.
